### HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.**

2. Per Applicant's request, claim 3 is cancelled.
3. Per Applicant's request, claims 1, 2, 21, 28, 29, 33, 35 and 36 have been amended.
4. Claims 1, 2, 4-5, 8-28, 30-37, 39, and 42-47 are allowed.

### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in communication with Kevin J. Canning (Reg. No. 35,470) on July 6, 2010 to obviate any potential issues and to put the claims in condition for allowance.

5. The application has been amended as follows:

1. (currently amended) In a computer system, a method for implementing and using a filter object, the method comprising:
  - providing the filter object instantiated from an object class in a dynamically typed text-based programming environment, the filter object including a state, and the filter object being represented by:
    - an output equation for generating an output of the filter object, and
    - a state equation for updating the state of the filter object;
  - implementing the filter object; and

Art Unit: 2191

determining an output of the filter object based on an input to the filter object in the dynamically typed text-based programming environment, determining the output of the filter object including:

- receiving the input at the filter object,
- identifying a first state of the filter object,
- splitting up the input into a first input and a second input,
- invoking a first call to a filtering method of the filter object to:

- process the output equation to determine a first output of the filter object based on the first input of the filter object and the first state of the filter object,
  - process the state equation to determine a second state of the filter object based on the first input of the filter object and the first state of the filter object,
  - retain the second state of the filter object in the dynamically typed text-based programming environment, and

- invoking a second call to the filtering method of the filter object to process the output equation to determine a second output of the filter object based on the second input of the filter object and the second state of the filter object that has been retained.

21. (currently amended) A computer-implemented method for generating an output of a system in response to an input to the system, the method comprising:

- implementing the system using a dynamically typed text-based programming environment the system including a filter object with a filtering method, the filter object being instantiated from an object class in the dynamically typed text-based programming environment;
- and

- using the system in the dynamically typed text-based programming environment, the system:

- dividing the input to the system into a first input to the system and a second input to the system;

- invoking a first call to the filtering method of the filter object to:

determine a first output of the system based on ~~the first input to the system~~  
and a first state of the system;

Deleted: a

determine a second state of the system based on the first input to the  
system and the first state of the system;

retain the second state of the system in the dynamically typed text-based  
programming environment so that the second state is available after the output of the  
system is determined; and

invoking a second call to the filtering method of the filter object to determine a  
second output of the system based on the second input to the system and the second state  
of the system that has been retained.

28. (currently amended) A computer readable medium holding instructions executable in a  
computer that provides a dynamically typed text-based programming environment, the  
instructions for:

providing an object, the object being an instance of a class ~~in the dynamically typed text-  
based programming environment;~~

~~dividing an input to the object into a first input to the object and a second input to the  
object;~~

invoking at least one method of the object to:

perform a first operation to determine a first output of the object based on ~~the first~~  
input to the object and a first state of the object;

Deleted: a

perform a second operation to determine a second state of the object based on the  
first input to the object and the first state of the object;

after completion of the first and second operations, retain the second state of the  
object in the dynamically typed text-based programming environment;

make the second state available after determining the output of the object; and

invoking the at least one method of the object to determine a second output of the object  
based on ~~the second input to the object and the second state of the object that has been retained.~~

Deleted: a

Art Unit: 2191

29. (canceled)

37. (currently amended) A system for implementing a filter object, the system comprising:

a processor configured to:

Deleted: process

~~instantiate an instance of the filter object in a dynamically typed text-based programming environment;~~

~~split an input to the filter object into a first input to the filter object and a second input to the filter object;~~

~~process an output equation of the filter object processed in a first operation to determine a first output of the filter object based on the first input to the filter object and a first state of the filter object, and processed in a second operation to determine a second output of the filter object based on the second input to the filter object and a second state of the filter object;~~

Deleted: a

Deleted: a

~~process a state equation of the filter object processed in a third operation to determine the second state of the filter object based on the first input to the filter object and the first state of the filter object; and~~

~~a memory for retaining the second state of the filter object in the dynamically typed text-~~

based programming environment after completion of the first and third operations so that the second state is available after the output equation and the state equation are processed.

6. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fail to teach every limitation as recited in independent claim 1 and similarly recited claims 21, 28 and 37.

Art Unit: 2191

The closest cited prior arts; USPGN 2001/0025292 by Denk et al. and DFS do not appear to disclose all the limitations as recited in the above independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
